Education

MEng Computer Science and Software Engineering University of Hull (2021 - 2025)

"So far at my time at the University of Hull, I have learnt key concepts and methodologies of software engineering including: Agile Processes, Data Structures, MR Development, UI/UX Experiences and Design Patterns. One of my achievements was delivering a finished .NET product that was buit using the Scrum method with our group."

A-Level Computer Science, Maths and BTEC Business Franklin College (2019 - 2021)

Skills

- C# and .NET
- MySql
- ASP.NET and Blazor
- Html/CSS/JS
- Github/Git
- Unity

Projects

Blogr (Current Project)

A blog sharing platform built with Blazor Webassembly and hosted on ASP.NET Core. Blogr uses Entity Framework, ASP.Net Identity and SignalR. More information and the repository can be found on my GitHub. Click the title for more.

Soc.it

A event sharing application that connects students and societies. Societies can could post events that could be attended by students. This project used Blazor Webassembly and MudBlazor and was a group university group project. Click the title for more.

Various Javascript Projects

Projects that use HTML, CSS and JS to create simple one page applications can be found on my [Github](#)

Achievements

- Completed National Citizenship Service where I raised money for Charity.
- Volunteered as Secretary of Crystal Clear DJs Society in 2022.
